

THE THIRTEEN COLONIES AND THE BRITISH EMPIRE, 1607-1754

If they desire that piety and godliness should prosper, accompanied with sobriety, justice and love, let them choose a Country such as this is; even like France, or England, which may yield sufficiency with hard labour and industry. . . .

Reverend John White, *The Planer's Plea*, 1630

Starting with Jamestown (Virginia) in 1607 and ending with Georgia in 1733, a total of 13 distinct English colonies developed along the Atlantic Coast of North America. Every colony received its identity and its authority to operate by means of a charter (a document granting special privileges) from the English monarch. Each charter described in general terms the relationship that was supposed to exist between the colony and the crown. Over time, three types of charters—and three types of colonies—developed:

- Corporate colonies, such as Jamestown, were operated by joint-stock companies, at least during these colonies' early years.
- Royal colonies, such as Virginia after 1624, were to be under the direct authority and rule of the king's government.
- Proprietary colonies, such as Maryland and Pennsylvania, were under the authority of individuals granted charters of ownership by the king.

Unlike the French and Spanish colonists, the English brought a tradition of representative government. They were accustomed to holding elections for representatives who would speak for property owners and decide important measures, such as taxes, proposed by the king's government. While political and religious conflicts dominated England, feelings for independence grew in the colonies. Eventually, tensions emerged between the king and his colonial subjects. This chapter summarizes the development of the English colonies.

Early English Settlements

In the early 1600s, England was finally in a position to colonize the 16th century more than a century earlier by John Cabot. By defeating a large Spanish fleet—the Spanish Armada—in 1588, England had gained a reputation as a major naval power. Also in this period, England's population was growing rapidly while its economy was depressed. The number of poor and landless people increased, people who were attracted to opportunities in the Americas. The English devised a practical method for financing the costly and risky enterprise of founding colonies. A joint-stock company pooled the savings of many investors, thereby spreading the risk. Thus, colonies on the North Atlantic Coast were able to attract large numbers of English settlers.

Jamestown

England's King James I chartered the Virginia Company, a joint-stock company that founded the first permanent English colony in America at Jamestown in 1607.

Early Problems The first settlers of Jamestown suffered greatly, mostly from their own mistakes. The settlement's location in a swampy area along James River resulted in fatal outbreaks of dysentery and malaria. Moreover, many of the settlers were gentlemen unaccustomed to physical work. Others were gold-seeking adventurers who refused to hunt or farm. One key source of goods was from trade with American Indians—but when conflicts erupted between settlers and the natives, trade would stop and settlers went hungry. Starvation was a persistent issue in Jamestown.

Through the forceful leadership of Captain John Smith, Jamestown survived its first five years, but barely. Then, through the efforts of John Rolfe, his Indian wife, Pocahontas, the colony developed a new variety of tobacco that would become popular in Europe and become a profitable crop.

Transition to a Royal Colony Despite tobacco, by 1624 the Virginia colony remained near collapse. More than 6,000 people had settled there, but only 2,000 remained alive. Further, the Virginia Company made unwise decisions that placed it heavily in debt. King James I had seen enough. He revoked the charter of the bankrupt company and took direct control of the colony. Now known as Virginia, the colony became England's first royal colony.

Plymouth and Massachusetts Bay

Religious motivation, not the search for wealth, was the principal force behind the settlement of two other English colonies, Plymouth and Massachusetts Bay. Both were settled by English Protestants who dissented from the official government-supported Church of England, also known as the Anglican Church. The leader of the Church of England was the monarch of England. The Church of England had broken away from the control of the pope in Rome, so it was no longer part of the Roman Catholic Church. However, it had kept most

the Catholic rituals and governing structure. The dissenters, influenced by the teachings of Swiss theologian John Calvin, charged that the Church of England should break more completely with Rome. In addition, the dissenters adopted Calvin's doctrine of predestination, the belief that God guides those he has selected for salvation even before their birth. England's King James I, who reigned from 1603 to 1625, viewed the religious dissenters as a threat to his religious and political authority and ordered them arrested and jailed.

The Plymouth Colony

Radical dissenters to the Church of England were known as the Separatists because they wanted to organize a completely separate church that was independent of royal control. Several hundred Separatists left England for Holland in search of religious freedom. Because of their travels, they became known as Pilgrims. Economic hardship and cultural differences with the Dutch led many of the Pilgrims to seek another haven for their religion. They chose the new colony in America, then operated by the Virginia Company of London. In 1620, a small group of Pilgrims set sail for Virginia aboard the *Mayflower*. Fewer than half of the 100 passengers on this ship were Separatists; the rest were people who had economic motives for making the voyage.

After a hard and stormy voyage of 65 days, the *Mayflower* dropped anchor off the Massachusetts coast, a few hundred miles to the north of the intended destination in Virginia. Rather than going on to Jamestown as planned, the Pilgrims decided to establish a new colony at Plymouth.

Early Hardships After a first winter that saw half their number perish, the settlers at Plymouth were helped to adapt to the land by friendly American Indians. They celebrated a good harvest at a thanksgiving feast (the first Thanksgiving) in 1621. Under strong leaders, including Captain Miles Standish and Governor William Bradford, the Plymouth colony grew slowly but remained small. Fish, furs, and lumber became the mainstays of the economy.

Massachusetts Bay Colony

A group of more moderate dissenters believed that the Church of England could be reformed. Because they wanted to purify the church, they became known as Puritans. The persecution of Puritans increased when a new king, Charles I, took the throne in 1625. Seeking religious freedom, a group of Puritans gained a royal charter for the Massachusetts Bay Company (1629).

In 1630, about a thousand Puritans led by John Winthrop sailed for the Massachusetts shore and founded Boston and several other towns. A civil war in England in the 1630s drove some 15,000 more settlers to the Massachusetts Bay Colony—a movement known as the Great Migration.

Early Political Institutions

From their very beginning, the American colonies began taking steps toward self-rule.

Representative Assembly in Virginia The Virginia Company encouraged settlement in Jamestown by guaranteeing colonists the same rights as residents of England, including representation in the lawmaking process. In 1619, just years after the founding of Jamestown, Virginia's colonists organized the representative assembly in America, the House of Burgesses.

Representative Government in New England Aboard the *Mayflower* 1620, the Pilgrims drew up and signed a document that pledged them to make decisions by the will of the majority. This document, known as the *Mayflower Compact*, was an early form of colonial self-government and a rudimentary written constitution.

In the Massachusetts Bay Colony, all freemen—male members of the Puritan Church—had the right to participate in yearly elections of the colony governor, his assistants, and a representative assembly.

Limits to Colonial Democracy Despite these steps, most colonists were excluded from the political process. Only male property owners could vote as representatives. Those who were either female or landless had few rights, slaves and indentured servants had practically none at all. Also, many colonial governors ruled with autocratic or unlimited powers, answering only to the king. Others in England who provided the colonies' financial support. Thus, the gradual development of democratic ideas in the colonies coexisted with antidemocratic practices such as slavery and the widespread mistreatment of American Indians.

The Chesapeake Colonies

In 1632, King Charles I subdivided the Virginia colony. He chartered a colony on either side of Chesapeake Bay and granted control of it to Cecil Calvert (Lord Baltimore), as a reward for this Catholic nobleman's service to crown. The new colony of Maryland thus became the first proprietary colony.

Religious Issues in Maryland

The king expected proprietors to carry out his wishes faithfully, thus giving control over a colony. The first Lord Baltimore died before he could achieve great wealth in his colony while also providing a haven for his fellow Catholics. The Maryland proprietorship passed to his son, Cecil Calvert—the second Lord Baltimore—who set about implementing his father's plan in 1634.

Act of Toleration To avoid persecution in England, several wealthy English Catholics emigrated to Maryland and established large colonial plantations. They were quickly outnumbered, however, by Protestant farmers. Protestants therefore held a majority in Maryland's assembly. In 1649, Calvert persuaded the assembly to adopt the Act of Toleration, the first colonial statute granting religious freedom to all Christians. However, the statute also called for the death of anyone who denied the divinity of Jesus.

Protestant Revolt In the late 1600s, Protestant resentment against a Catholic proprietor erupted into a brief civil war. The Protestants triumphed, and the Act of Toleration was repealed. Catholics lost their right to vote in elections for the Maryland assembly. In the 18th century, Maryland's economy and society was much like that of neighboring Virginia, except that in Maryland there was greater tolerance of religious diversity among different Protestant sects.

Labor Shortages

In both Maryland and Virginia, landowners saw great opportunities. They could get land, either by taking it from or trading for it with American Indians, and Europeans had a growing demand for tobacco. However, they could not find enough laborers. For example, in Virginia, the high death rate from disease, food shortages, and battles with American Indians meant that the population grew slowly. Landowners tried several ways to find the workers they wanted.

Indentured Servants At first, the Virginia Company hoped to meet the need for labor using indentured servants. Under contract with a master or landowner who paid for their passage, young people from the British Isles agreed to work for a specified period—usually between four to seven years—in return for room and board. In effect, indentured servants were under the absolute rule of their masters until the end of their work period. At the expiration of that period, they gained their freedom and either worked for wages or obtained land of their own to farm. For landowners, the system provided laborers, but only temporarily.

Headright System Virginia attempted to attract immigrants through offers of land. The colony offered 50 acres of land to (1) each immigrant who paid for his own passage and (2) any plantation owner who paid for an immigrant's passage.

Slavery In 1619, a Dutch ship brought an unusual group of indentured servants to Virginia: they were black Africans. Because English law at that time did not recognize hereditary slavery, the first Africans in Virginia were not in bondage for life, and any children born to them were free. Moreover, the early colonists were struggling to survive and too poor to purchase the Africans who were being imported as slaves for sugar plantations in the West Indies. By 1650, there were only about 400 African laborers in Virginia. However, by the end of the 1660s, the Virginia House of Burgesses had enacted laws that discriminated between blacks and whites. Africans and their offspring were to be kept in permanent bondage. They were slaves.

Economic Problems Beginning in the 1660s, low tobacco prices, due largely to overproduction, brought hard times to the Chesapeake colonies Maryland and Virginia. When Virginia's House of Burgesses attempted to raise tobacco prices, the merchants of London retaliated by raising their own prices on goods exported to Virginia.

Conflict in Virginia

Sir William Berkeley, the royal governor of Virginia (1641–1652, 1660–1677) used dictatorial powers to govern on behalf of the large planters. He antagonized small farmers on Virginia's western frontier because he failed to protect them from Indian attacks.

Bacon's Rebellion Nathaniel Bacon, an impoverished gentleman farmer, seized upon the grievances of the western farmers to lead a rebellion against Berkeley's government. Bacon and others resented the economic and political control exercised by a few large planters in the Chesapeake area. He raised an army of volunteers and, in 1676, conducted a series of raids and massacres against American Indian villages on the Virginia frontier. Berkeley's government in Jamestown accused Bacon of rebelling against royal authority. Bacon's arrest succeeded in defeating the governor's forces and even burned the Jamestown settlement. Soon afterward, Bacon died of dysentery and the rebel army collapsed. Governor Berkeley brutally suppressed the remnants of the insurrection, executing 23 rebels.

Lasting Problems Although it was short-lived, Bacon's Rebellion, or the Chesapeake Revolution, highlighted two long-lasting disputes in colonial Virginia: (1) sharp class differences between wealthy planters and landless or poor farmers, and (2) colonial resistance to royal control. These problems would continue into the next century, even after the general conditions of life in the Chesapeake colonies became more stable and prosperous.

Development of New England

Strong religious convictions helped sustain settlers in their struggle to establish the Plymouth and Massachusetts Bay colonies. However, Puritan leaders showed intolerance of anyone who questioned their religious teachings. The Puritans often banished dissidents from the Bay colony. These banished dissidents formed settlements that would develop into Rhode Island and Connecticut.

Rhode Island Roger Williams went to Boston in 1631 as a respected Puritan minister. He believed, however, that the individual's conscience was beyond the control of any civil or church authority. His teachings on this point placed him in conflict with other Puritan leaders, who ordered his banishment from the Bay colony. Leaving Boston, Williams fled southward to Narragansett Bay, where he and a few followers founded the settlement of Providence in 1633. The new colony was unique in two respects. First, it recognized the rights of American Indians and paid them for the use of their land. Second, William's government allowed Catholics, Quakers, and Jews to worship freely. William also founded one of the first Baptist churches in America.

Another dissident who questioned the doctrines of the Puritan authorities was Anne Hutchinson. She believed in *antinomianism*—the idea that faith alone, not deeds, is necessary for salvation. Banished from the Bay colony, Hutchinson and a group of followers founded the colony of Portsmouth in 1639.

1638, not far from Williams' colony of Providence. A few years later, Hutchinson migrated to Long Island and was killed in an American Indian uprising.

In 1644, Roger Williams was granted a charter from the Parliament that joined Providence and Portsmouth into a single colony, Rhode Island. Because this colony tolerated diverse beliefs, it served as a refuge for many.

Connecticut To the west of Rhode Island, the fertile Connecticut River Valley attracted other settlers who were unhappy with the Massachusetts authorities. The Reverend Thomas Hooker led a large group of Boston Puritans into the valley and founded the colony of Hartford in 1636. The Hartford settlers then drew up the first written constitution in American history, the *Fundamental Orders of Connecticut* (1639). It established a representative government consisting of a legislature elected by popular vote and a governor chosen by that legislature. South of Hartford, a second settlement in the Connecticut Valley was started by John Davenport in 1637 and given the name New Haven.

In 1665, New Haven joined with the more democratic Hartford settlers to form the colony of Connecticut. The royal charter for Connecticut granted it a limited degree of self-government, including election of the governor.

NEW ENGLAND AND ATLANTIC COLONIES

1600s

New Hampshire The last colony to be founded in New England was New Hampshire. Originally part of Massachusetts Bay, it consisted of a few settlements north of Boston. Hoping to increase royal control over the colonies, King Charles II separated New Hampshire from the Bay colony in 1679 and made a royal colony, subject to the authority of an appointed governor.

Halfway Covenant In the 1660s, a generation had passed since the founding of the first Puritan colonies in New England. To be a full member of Puritan congregation, an individual needed to have felt a profound religious experience known as a conversion. However, fewer members of the new native-born generation were having such experiences. In an effort to maintain the church's influence and membership, a *halfway covenant* was offered by some clergy. Under this, people could become partial church members even if they had not had felt a conversion.

Other ministers rejected the halfway covenant and denounced it from the pulpit. Nevertheless, as the years passed, strict Puritan practices weakened most New England communities in order to maintain church membership.

New England Confederation In the 1640s, the New England colonies faced the constant threat of attack from American Indians, the Dutch, and the French. Because England was in the midst of a civil war, the colonists could expect little assistance. Therefore in 1643, four New England colonies (Plymouth, Massachusetts Bay, Connecticut, and New Haven) formed a military alliance known as the New England Confederation. The confederation was directed by a board composed of two representatives from each colony. It had limited powers to act on boundary disputes, the return of runaway servants, and dealings with American Indians.

The confederation lasted until 1684, when colonial rivalries and renewed control by the English monarch brought this first experiment in colonial cooperation to an end. It was important because it established a precedent for colonial taking unified action toward a common purpose.

King Philip's War Only a few years before the confederation's demise, helped the New England colonists cope successfully with a dire threat. A chief of the Wampanoags named Metacomb—known to the colonists as King Philip—united many tribes in southern New England against the English settlers, who were constantly encroaching on the American Indians' lands. In a vicious war (1675–1676), thousands on both sides were killed, and dozens of towns and villages were burned. Eventually, the colonial forces prevailed, killing King Philip and ending most American Indian resistance in New England.

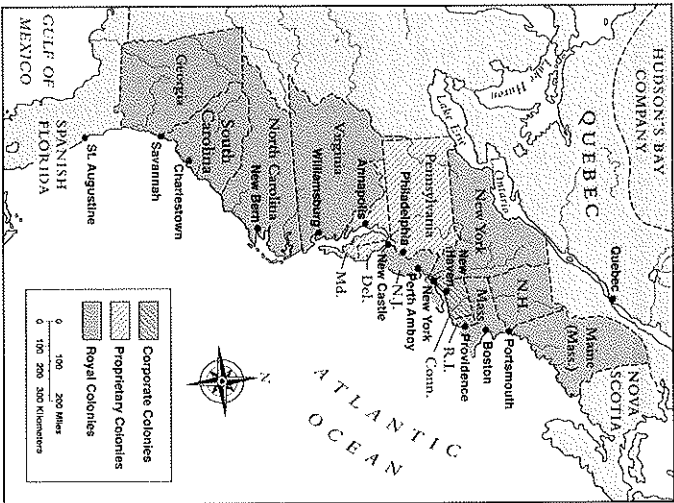

Restoration Colonies

New American colonies were founded in the late 17th century during a period in English history known as the Restoration. (The name refers to the restoration to power of an English monarch, Charles II, in 1660 following a brief period of Puritan rule under Oliver Cromwell.)

The Carolinas

As a reward for helping him gain the throne, Charles II granted a huge tract of land between Virginia and Spanish Florida to eight nobles, who in 1663 became the lord proprietors of the Carolinas. In 1729, two royal colonies, South Carolina and North Carolina, were formed from the original grant.

THE THIRTEEN ENGLISH COLONIES
AROUND 1750

South Carolina In 1670, in the southern Carolinas, a few colonists from England and some planters from the island of Barbados founded a town named Charleston. The southern economy was based on trading furs and providing food for the West Indies. By the middle of the 18th century, South Carolina's large rice-growing plantations worked by enslaved Africans reshaped the economy and culture of the West Indies.

North Carolina The northern part of the Carolinas developed differently. There, farmers from Virginia and New England established small, self-sufficient tobacco farms. The region had few good harbors and poor transportation; therefore, compared to South Carolina, there were fewer large plantations and less reliance on slavery. North Carolina in the 18th century earned a reputation for democratic views and autonomy from British control.

New York

Charles II wished to consolidate the crown's holdings along the Atlantic Coast and close the gap between the New England and the Chesapeake colonies. This required compelling the Dutch to give up their colony of New Amsterdam, centered on Manhattan Island and the Hudson River Valley.

In 1664, the king granted his brother, the Duke of York (the future James II), the lands lying between Connecticut and Delaware Bay. As the lord high admiral of the navy, James dispatched a force that easily took control of Dutch colony from its governor, Peter Stuyvesant. James ordered his agents in the renamed colony of New York to treat the Dutch settlers well and allow them freedom to worship as they pleased and speak their own language.

James also ordered new taxes, duties, and rents without seeking the consent of a representative assembly. In fact, he insisted that no assembly should be allowed to form in his colony. But taxation without representation met with strong opposition from New York's English-speaking settlers, most of whom were Puritans from New England. Finally, in 1683, James yielded by allowing New York's governor to grant broad civil and political rights, including representative assembly.

New Jersey

Believing that the territory of New York was too large to administer, James sent William Penn to the colony in 1664. He gave the section of the colony located between the Hudson River and Delaware Bay to Lord John Berkeley and Sir George Carteret. In 1674, Carteret and Berkeley received West New Jersey and the other East New Jersey. To attract settlers, both proprietors made generous land offers and allowed religious freedom and an assembly. Eventually, they sold their proprietary interests to various groups of Quakers. Land titles in the Jerseys changed hands repeatedly, and inaccurate property lines added to the general confusion. To settle matters, the crown decided in 1702 to combine the two Jerseys into a single royal colony, New Jersey.

Pennsylvania and Delaware

To the west of New Jersey lay a broad expanse of forested land that was originally settled by a peace-loving Christian sect, the Quakers.

Quakers Members of the Religious Society of Friends—commonly known as Quakers—believed in the equality of all men and women, nonviolence, and resistance to military service. They further believed that religious authority was found within each person's soul and not in the Bible and not in any outside source. Such views posed a radical challenge to established authority. Therefore, the Quakers of England were persecuted and jailed for their beliefs.

William Penn William Penn was a young convert to the Quaker faith. His father had served the king as a victorious admiral. Although the elder Penn opposed his son's religious beliefs, he respected William's sincerity and bequeathed him considerable wealth. In addition, the royal family owed the father a large debt, which they paid to William in 1681 in the form of a grant of American land for a colony that he called Pennsylvania, or Penn's woods.

"The Holy Experiment" Penn put his Quaker beliefs to the test in his colony. He wanted his new colony to provide a religious refuge for Quakers and other persecuted people, to enact liberal ideas in government, and generate income and profits for himself. He provided the colony with a Frame of Government (1682–1683), which guaranteed a representative assembly elected by landowners, and a written constitution, the Charter of Liberties (1701), which guaranteed freedom of worship for all and unrestricted immigration.

Unlike other colonial proprietors, who governed from afar in England, Penn crossed the ocean to supervise the founding of a new town on the Delaware River named Philadelphia. He brought with him a plan for a grid pattern of streets, which was later imitated by other American cities. Also unusual was Penn's attempt to treat the American Indians fairly and not to cheat them when purchasing their land.

To attract settlers to his new land, Penn hired agents and published notices throughout Europe, which promised political and religious freedom and generous land terms. Penn's lands along the Delaware River had previously been settled by several thousand Dutch and Swedish colonists, who eased the arrival of the newcomers attracted by Penn's promotion.

Delaware In 1702, Penn granted the lower three counties of Pennsylvania their own assembly. In effect, Delaware became a separate colony, even though its governor was the same as Pennsylvania's until the American Revolution.

Georgia: The Last Colony

In 1732, a thirteenth colony, Georgia, was chartered. It was the last of the British colonies and the only one to receive direct financial support from the government in London. There were two reasons for British interest in starting a new southern colony. First, Britain wanted to create a defensive buffer to protect the prosperous South Carolina plantations from the threat of Spanish

Florida. Second, thousands of people in England were being imprisoned debt. Wealthy philanthropists thought it would relieve the overcrowded jails if debtors were shipped to an American colony to start life over.

Special Regulations Given a royal charter for a proprietary colony, a group of philanthropists led by James Oglethorpe founded Georgia's first settlement Savannah. In 1733, Oglethorpe acted as the colony's first governor and put effect an elaborate plan for making the colony thrive. There were strict regulations, including bans on drinking rum and slavery. Nevertheless, partly because of the constant threat of Spanish attack, the colony did not prosper.

Royal Colony By 1752, Oglethorpe and his group gave up their part. Taken over by the British government, Georgia became a royal colony. Restrictions on rum and slavery were dropped. The colony grew slowly by adopting the plantation system of South Carolina. Even so, at the time of the American Revolution, Georgia was the smallest and poorest of the 13 colonies.

Mercantilism and the Empire

Most European kingdoms in the 17th century adopted the economic policy of *mercantilism*, which looked upon trade, colonies, and the accumulation of wealth as the basis for a country's military and political strength. According to mercantilist doctrine, a government should regulate trade and production to enable it to become self-sufficient. Colonies were to provide raw materials for the parent country for the growth and profit of that country's industries. Colonies existed for one purpose only: to enrich the parent country.

Mercantilist policies had guided both the Spaniards and the French colonies from their inception. Mercantilism began to be applied to the English colonies, however, only after the turmoil of England's civil war had subsided. **Acts of Trade and Navigation** England's government implemented a mercantilist policy with a series of Navigation Acts between 1650 and 1673, which established three rules for colonial trade:

1. Trade to and from the colonies could be carried only by English colonial-built ships, which could be operated only by English or colonial crews.
2. All goods imported into the colonies, except for some perishables, had to pass through ports in England.
3. Specified or "enumerated" goods from the colonies could be exported to England only. Tobacco was the original "enumerated" good, but over the years, the list was greatly expanded.

Impact on the Colonies The Navigation Acts had mixed effects on the colonies. The acts caused New England shipbuilding to prosper, provided Chesapeake tobacco with a monopoly in England, and provided English military forces to protect the colonies from potential attacks by the French and Spanish. However, the acts also severely limited the development of col-

economic opportunity either by farming new land or setting up shop in a colonial town as an artisan or a merchant. Most immigrants settled in the middle colonies (Pennsylvania, New York, New Jersey, Maryland, and Delaware) and on the western frontier of the southern colonies (Virginia, the Carolinas, and Georgia). In the 18th century, few immigrants headed for New England, where land was both limited in extent and under Puritan control.

English Settlers from England continued to come to the American colonies. However, with fewer problems at home, their numbers were relatively small compared to others, especially the Germans and Scotch-Irish.

Germans This group of non-English immigrants settled chiefly on the rich farmlands west of Philadelphia, an area that became known as Pennsylvania Dutch country. They maintained their German language, customs, and religion (Lutheran, Amish, Brethren, Mennonite, or one of several smaller groups) and, while obeying colonial laws, showed little interest in English politics. By 1775, people of German stock comprised 6 percent of the colonial population.

Scotch-Irish These English-speaking people emigrated from northern Ireland. Since their ancestors had moved to Ireland from Scotland, they were commonly known as the Scotch-Irish or Scots-Irish. They had little respect for the British government, which had pressured them into leaving Ireland. Most settled along the frontier in the western parts of Pennsylvania, Virginia, the Carolinas, and Georgia. By 1775, they comprised 7 percent of the population.

Other Europeans Other immigrant groups included French Protestants (called Huguenots), the Dutch, and the Swedes. These groups made up 5 percent of the population of all the colonies in 1775.

Africans

The largest single group of non-English immigrants did not come to America by choice. They were Africans—or the descendants of Africans—who had been taken captive, forced into European ships, and sold as enslaved laborers to southern plantation owners and other colonists. Some Africans were granted their freedom after years of forced labor. Outside the South, thousands of African Americans worked at a broad range of occupations, such as being a laborer, bricklayer, or blacksmith. Some of these workers were enslaved and others were free wage earners and property owners. Every colony, from New Hampshire to Georgia, passed laws that discriminated against African Americans and limited their rights and opportunities.

By 1775, the African American population (both enslaved and free) made up 20 percent of the colonial population. About 90 percent lived in the southern colonies in lifelong bondage. African Americans formed a majority of the population in South Carolina and Georgia.

The Structure of Colonial Society

Each of the thirteen British colonies developed distinct patterns of life. However, they all also shared a number of characteristics.

General Characteristics

Most of the population was English in origin, language, and tradition. However, both Africans and non-English immigrants brought diverse influences that would modify the culture of the majority in significant ways.

Self-government The government of each colony had a representative assembly that was elected by eligible voters (limited to white male property owners). In only two colonies, Rhode Island and Connecticut, was the governor elected by the people. The governors of the other colonies were either appointed by the crown (for example, New York and Virginia) or by a proprietor (Pennsylvania and Maryland).

Religious Toleration All of the colonies permitted the practice of different religions, but with varying degrees of freedom. Massachusetts, the most conservative, accepted several types of Protestants, but it excluded non-Christians and Catholics. Rhode Island and Pennsylvania were the most liberal.

No Hereditary Aristocracy The social extremes of Europe, with a nobility that inherited special privileges and masses of hungry poor, were missing in the colonies. A narrower class system, based on economics, was developing. Wealthy landowners were at the top; craft workers and small farmers made the majority of the common people.

Social Mobility With the major exception of the African Americans, people in colonial society had an opportunity to improve their standard of living and social status by hard work.

The Family

The family was the economic and social center of colonial life. With expanding economy and ample food supply, people married at a younger age and reared more children than in Europe. More than 90 percent of the people lived on farms. While life in the coastal communities and on the frontier was hard, most colonists had a higher standard of living than did most Europeans.

Men While wealth was increasingly being concentrated in the hands of a few, most men did work. Landowning was primarily reserved to men, who also dominated politics. English law gave the husband almost unlimited power at the home, including the right to beat his wife.

Women The average colonial wife bore eight children and performed a wide range of tasks. Household work included cooking, cleaning, making clothes, and providing medical care. Women also educated the children. A woman usually worked next to her husband in the shop, on the plantation, or the farm. Divorce was legal but rare, and women had limited legal and political rights. Yet the shared labors and mutual dependence with their husbands gave most women protection from abuse and a certain stability in their lives.

The Economy

By the 1760s, almost half of Britain's world trade was with its American colonies. The British government permitted limited kinds of colonial manufacturing, such as making flour or rum. It restricted efforts that would compete with English industries, such as textiles. The richness of the American land and British mercantile policy produced colonies almost entirely engaged in agriculture.

As the people prospered and communities grew, increasing numbers became ministers, lawyers, doctors, and teachers. The quickest route to wealth was through the land, although regional geography often provided distinct opportunities for hardworking colonists.

New England With rocky soil and long winters, farming was limited to subsistence levels that provided just enough for the farm family. Most farms were small—under 100 acres—and most work was done by family members and an occasional hired laborer. The industrious descendants of the Puritans profited from logging, shipbuilding, fishing, trading, and rum-distilling.

Middle Colonies Rich soil produced an abundance of wheat and corn for export to Europe and the West Indies. Farms of up to 200 acres were common. Often, indentured servants and hired laborers worked with the farm family. A variety of small manufacturing efforts developed, including iron-making. Trading led to the growth of such cities as Philadelphia and New York.

Southern Colonies Because of the diverse geography and climate of the southern colonies, agriculture varied greatly. Most people lived on small subsistence family farms with no slaves. A few lived on large plantations of over 2,000 acres and relied on slave labor. Plantations were self-sufficient—they grew their own food and had their own slave craftworkers. Products were mainly tobacco in the Chesapeake and North Carolina colonies, timber and naval stores (tar and pitch) in the Carolinas, and rice and indigo in South Carolina and Georgia. Most plantations were located on rivers so they could ship exports directly to Europe.

Monetary System One way the British controlled the colonial economy was to limit the use of money. The growing colonies were forced to use much of the limited hard currency—gold and silver—to pay for the imports from Britain that increasingly exceeded colonial exports. To provide currency for domestic trade, many colonies issued paper money, but this often led to inflation. The British government also vetoed colonial laws that might harm British merchants.

Transportation Transporting goods by water was much easier than attempting to carry them over land on rough and narrow roads or trails. Therefore, trading centers such as Boston, New York, Philadelphia, and Charleston were located on the sites of good harbors and navigable rivers. Despite the difficulty and expense of maintaining roads and bridges, overland travel by horse and stage became more common in the 18th century. Taverns not only provided food and lodging for travelers, but also served as social centers where news was exchanged and politics discussed. A postal system using horses on overland routes and small ships on water routes was operating both within and between the colonies by the mid-18th century.

Religion

Although Maryland was founded by a Catholic proprietor, and larger towns such as New York and Boston attracted some Jewish settlers, the overwhelming majority of colonists belonged to various Protestant denominations. In New England, Congregationalists (the successors to the Puritans) and Presbyterian were most common. In New York, people of Dutch descent often attended services of the Reformed Church, while many merchants belonged to the Church of England, also known as Anglicans (and later, Episcopalians). In Pennsylvania, Lutherans, Mennonites, and Quakers were the most common groups. Anglicans were dominant in Virginia and some of the other southern colonies.

Challenges Each religious group, even the Protestants who dominated the colonies, faced problems. Jews, Catholics, and Quakers suffered from the most serious discrimination and even persecution. Congregationalist ministers were criticized by other Protestants as domineering and for preaching an overly complex doctrine. Because the Church of England was headed by the king, it was viewed as a symbol of English control in the colonies. In addition, there was a Church of England bishop in America to ordain ministers. The absence of such leadership hampered the church's development.

Established Churches In the 17th century, most colonial governments taxed the people to support one particular Protestant denomination. Churches financed through the government are known as established churches. For example, in Virginia, the established church was the Church of England. Massachusetts Bay it was the Congregational Church. As various immigrant groups increased the religious diversity of the colonies, governments gradually reduced their support of churches. In Virginia, all tax support for the Anglican Church ended shortly after the Revolution. In Massachusetts by the time of the Revolution, members of other denominations were exempt from supporting the Congregational Church. However, some direct tax support of the denomination remained until the 1830s.

The Great Awakening

In the first decades of the 18th century, sermons in Protestant churches tended to be long intellectual discourses and portrayed God as a benign creator of a perfectly ordered universe. Ministers gave less emphasis than in Puritan times to human sinfulness and the perils of damnation. In the 1730s, however, a dramatic change occurred that swept through the colonies with the force of a hurricane. This was the Great Awakening, a movement characterized by fervent expressions of religious feeling among masses of people. The movement was at its strongest during the 1730s and 1740s.

Jonathan Edwards In a Congregational church at Northampton, Massachusetts, Reverend Jonathan Edwards expressed the Great Awakening ideas in series of sermons, notably one called "Sinners in the Hands of an Angry God" (1741). Invoking the Old Testament scriptures, Edwards argued that God was rightfully angry with human sinfulness. Each individual who expressed deep
